
Notes:

- The main purpose of this session is to get familiar with MARS MIPS simulator tool only
- **Students are NOT requested to submit your answers for this session.**
- To download the MARS MIPS simulator, the link from developers (<https://goo.gl/497FVV>) can be used. Besides, the additional download link (<https://goo.gl/ECR2k6>) can be used as an alternative.
- The MARS MIPS simulator requires JDK which is downloadable from Oracle website to execute.
- To get a simple MARS MIPS tutorial, please check out this link (<https://goo.gl/CUzFTi>) and this link (<https://goo.gl/8m6Tzi>).
- Please note that the register `$zero` can be described as `$0`.

There is no any questions this session, but you need to practice a lot to get familiar with MARS MIPS so that in the upcoming weeks you are able to write MIPS assembly program to submit

—————the end—————
